**For those new to our sport a little explanation may help you enjoy your day.**

**The Pre '65 group;** white numbers on black plates. Is fairly self-explanatory - Bikes manufactured prior to 1965, some modification is allowed but the bike should remain in the spirit of the period.

**The pre '74 group;** white numbers on green plates - up to 250cc white numbers on red plates over 250cc. Bikes manufactured prior to 1974. Both pre '65's & pre '74's groups are sub divided into two engine sizes groups.

**Twinshocks;** Black numbers on yellow plates. These are divided into ability groups, A being the faster group through to D for the less competitive minded rider. Engine size is not considered in these groups. Twinshocks should have - two rear shock absorbers, drum brakes and an air cooled engine. There are exceptions, such as the single shock Yamahas that you can see here today, but that opens up a whole can of worms.....

### What Is Vapour Blasting?
